COMPANY PROFILE

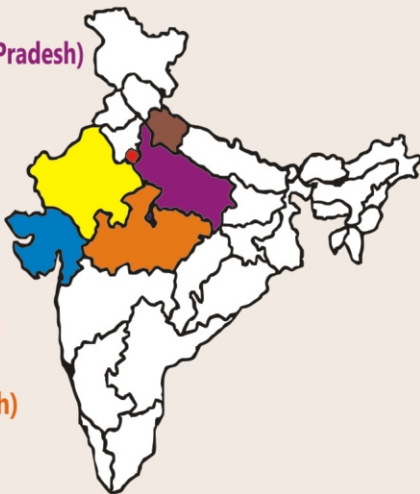

Established as a centre of Excellence in 1998, Meenakshi Diagnostics is now a group of 45 Diagnostics centres spread across Northern & Western India.

We have multiple operational Diagnostic centres in Gujarat for more than 15 years now. These Diagnostic centres are equipped with State of the art Hi-end diagnostic equipment's.

Our considerable experience and expertise in the field of Radiology services has helped to address the growing ailments by providing accurate & timely diagnosis with the help of specialized technologies and innovative services.

WE ALSO HAVE PRESENCE IN OTHER CITIES:

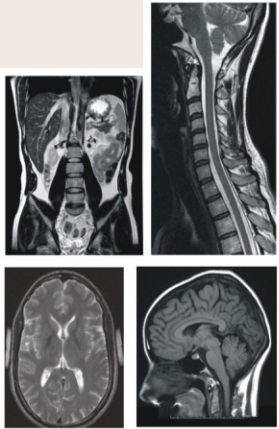

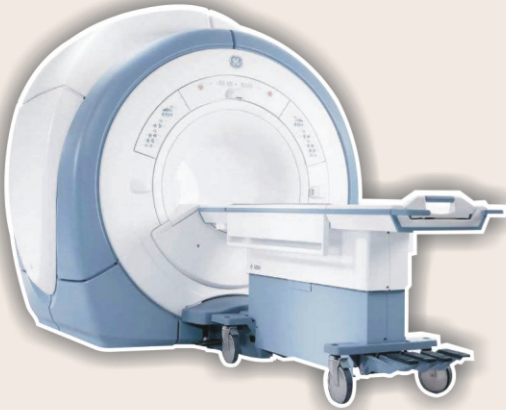

- **New Delhi**
- **Noida (Uttar Pradesh)**
- **Greater Noida West (Uttar Pradesh)**
- **Ahmedabad (Gujarat)**
- **Bhavnagar (Gujarat)**
- **Mehsana (Gujarat)**
- **Surat (Gujarat)**
- **Haldwani (Uttarakhand)**
- **Bhilwara (Rajasthan)**
- **Bhopal (Madhya Pradesh)**
- **Indore (Madhya Pradesh)**
- **Jabalpur (Madhya Pradesh)**
- **Mathura (Uttar Pradesh)**
- **Meerut (Uttar Pradesh)**
- **Bijnor (Uttar Pradesh)**
- **Bulandshahr (Uttar Pradesh)**

“Bringing the future of healthcare”

A Landmark Achievement for Greater Ahmedabad East in the field of Diagnostics

MRI With Upgraded Software of 3 Tesla Platform

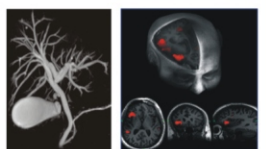

THE IMPORTANCE OF MRI IN MODERN HEALTHCARE

Magnetic Resonance Imaging (MRI) is a Vital, non-invasive diagnostic tool that plays a key role in modern medicine. Using powerful magnets and radio waves, MRI produces highly detailed images of the body's internal structures, including the brain, spine, joints, and soft tissues. Unlike X-rays or CT scans, MRI does not use ionizing radiation, making it a safer option for patients of all ages, including children and those who require multiple scans over time. It is especially valuable in detecting and monitoring conditions such as tumors, strokes, spinal cord injuries, ligament injuries, disc problems and joint abnormalities. No pain and minimal preparation, MRI is a safe and essential part of today's healthcare services

SPECIAL INVESTIGATIONS MRI

- Non Contrast Renal & Peripheral Angiographies
- MRI Imaging for Trigeminal Neuralgia
- Perfusion & Multivoxel MRS Brain
- MRCP & MRU
- Dynamic Breast Imaging
- Whole body MR Imaging
- mpMRI Prostate

**World class machine Excellent ambience

**Multi Slice
CT Scan**

THE IMPORTANCE OF CT SCANS IN MODERN DIAGNOSIS

Computed Tomography (CT), is a powerful imaging technique that provides fast, detailed cross-sectional images of the body. By combining X-ray technology with advanced computer processing, CT scans allow doctors to view internal organs, bones, blood vessels, and soft tissues with remarkable clarity. CT scans are commonly used to detect a variety of health issues, including infections, tumors, internal bleeding, bone fractures, and lung or abdominal conditions and especially valuable in emergency situations which can be life saving. They also play a key role in planning surgeries, and monitoring treatment progress. While CT does involve a small dose of radiation, modern machines are designed to minimize exposure while maximizing image quality.

Special Investigations CT

- Special Investigation
- Triple Phase Imaging
- Whole body Angiograph
- HRCT Chest & Temporal Bone
- CT scan Guided Biopsy & Intervetional Procedures
- Whole Body Imaging
- 3D Reconstruction

3D/4D Sonography

- General Body Sonography
- Obstetric & Gynaecological Sonography
- 3D/4D Sonography
- Small Parts Sonography
- Colour Doppler Studies of all Kinds
- Sonography Guided Interventions Procedures & Biopsy

The Role of Sonography and

the Benefits of 3D/4D Scanning : Sonography (USG) is a safe, non-invasive imaging technique that uses high-frequency sound waves to create real-time images of the inside of the body. It is widely used across all age groups, to examine internal organs, blood flow, soft tissues, and monitoring pregnancy. Sonography does not use radiation, making it an especially safe option for pregnant women and developing babies.

3D Sonography : Allows us to capture lifelike, three-dimension of organs or the fetus, offering more detail than traditional scans.

4D Sonography : Adds the dimension of time, showing real-time motion-such as a baby yawning, stretching, or smiling in the womb. These enhancements not only improve diagnostic accuracy but also provide a more personal and emotionally enriching experience for expectant parents.

Elastography : a technique that measures tissue stiffness is particularly useful in assessing the liver, thyroid, and breast tissues for early signs of disease, such as fibrosis or tumors. Elastography adds valuable information that complements standard ultrasound, helping clinicians make more confident and informed decisions without the need for invasive procedures.

Digital X-Ray

- All body parts Digital X-ray
- All Special Investigations
- X-ray Procedures

Radiologist Doctor Team

ABOUT

Dr. Chetan Sarvakar

Consultant Radiologist
DMRD, DNB, FRCR (UK)

With over 15 years of experience in diagnostic radiology, Dr. Chetan Sarvakar is a highly skilled consultant radiologist, specializing in Musculoskeletal (MSK), Neuro, and Abdominal Radiology.

Former Associations:

- Sahyog Imaging Centre, Civil Hospital Campus, Ahmedabad
- Sanya Diagnostic PET-CT Centre, Ahmedabad
- Sanya Pixel Diagnostic Centre, Ahmedabad
- Satyam Diagnostics, Maninagar, Ahmedabad

Currently Associated With:

- Meenakshi CT Scan Centre, C/o Rajasthan Hospital, Ahmedabad
- Satyam Diagnostics, Bapunagar, Ahmedabad

Dr. Sarvakar's diagnostic acumen and clinical precision have made him a trusted name in the field of radiology. His international qualification (FRCR UK) complements his extensive training in India, offering patients the best of global standards and local expertise.

ABOUT

Dr. Sandip Mevada

Consultant Radiologist
M.D.

Dr. Sandip Mevada is a Senior Consultant Radiologist associated with Satyam Diagnostics with more than 15 years of experience in Diagnostic radiology. He has presented more than 50 papers and more than 50 guest lectures in various Radiology and Clinical Conference. He is prominent figure in Diagnostic Radiology with special interest in Gastrointestinal Radiology and Neuro-radiology.

Associated with,

- Satyam Diagnostics, Maninagar, Bapunagar, Vastral
- Jivraj Mehta Hospital, Ahmedabad.
- Janki Imaging Centre, Nadiad

He is also a Treasurer of Gujarat State Chapter of Indian Radiology and Imaging Association.

ABOUT

Dr. Aniruddhsinh P. Rahevar

Consultant Radiologist
DMRD, DNB

Borad certified radiologist with more than 12 years experience in diagnostics and interventional imaging. Expert on MRI, CT, Sonography, skilled in teaching and multidisciplinary case management. He reads 800 plus studies / week with improved CT/MRI turnaround. He did MBBS and radiology from BJ Medical college and GCRI cancer institutions respectively.

He got further DNB fellowship radiology from very highly appreciated Apollo Hospital in Chennai.

He has rotations in neuro radiology and interventional procedures. He has given multiple talks on various aspects to the radiology community and physicians community. He is lifetime member of IRIA and ISHNR (Indian society of Head and Neck radiology) and He is elected committee member of Gujarat state radiology 2025-2026.
